

QUALITY DOORS FOR EVERY OCCASION
PRODUCT BROCHURE

True craftspeople with an uncommon attention to detail are behind every door we make.

QUALITY DOORS – FOR LIFE

Built in 2001, our newest plant was designed to accommodate the latest in tools and equipment.

From order to delivery, Lemieux Doors approaches every phase of manufacturing with equal diligence and priority.

Innovation takes on a whole new meaning at Lemieux Doors, a company dedicated to combing the globe for breakthrough technology, and developing advanced manufacturing methods. Increased productivity without compromising quality is the prime objective! And throughout the years Lemieux Doors hasn't stopped evolving, offering more value by streamlining operations and remaining truly competitive.

Innovation is very clearly the guiding principle at Lemieux Doors! Witness its product configuration SAP software, linking together all vital company protocol, and the implementation, at its new plant, of one of the world's largest environmentally friendly solar heating systems. Indeed the Canadian Solar Energies Association bestowed upon Lemieux the 2005 "Solar Thermal Project of the Year" award.

Above and beyond the advantages of technology and innovation is the importance of a dynamic team dedicated to this company's focus on the highest quality product. Our team is a valuable asset, and Lemieux Doors is committed to the well-being of our staff, and to a secure, stimulating work environment.

With this unparalleled vision and outstanding corporate mission, it's little wonder Lemieux Doors finds itself among the global leaders in the manufacture of doors.

LEMIEUX DOORS – INSIDE AND OUT

Lemieux Doors is committed to the latest technology, which ensures quality control while streamlining operations and remaining highly competitive.

Manufactured using a combination of processes geared towards excellence, each Lemieux door is individually detailed, assuring an extraordinary fit and finish. Lemieux is part of a rare breed, a large-scale, world-class manufacturer employing construction techniques specifically designed to produce doors of the highest quality. Our R&D department is forever on the lookout for the latest in technological advances and cutting-edge equipment in order to continually heighten quality and further productivity.

An Innovative Finish

Lemieux Doors has invested millions perfecting a protective UV sealer system, which when applied immediately before the finishing coat, seals the wood, removing all traces of cracks or crevices in the joints, and avoids accentuating brush strokes, knots, and wood grain.

The Tenon & Mortise Joint – Quality & Tradition

Lemieux Doors employs proven age-old mortise & tenon joints in its doors, assuring the highest quality construction. Furthermore the adhesive binding technique delivers exceptional strength and a lasting hold. The absence of dowels allows the doors to be custom-trimmed during installation without risk of voiding the guarantee.

Expansion-Resistant MDF Panels

Lemieux Doors incorporates Medium Density Fibre panels into the construction of all its doors. MDF is expansion resistant and inherently more stable, able to withstand the extremes of seasonal temperature variations, thus protecting against cracks and leaks.

INTERIOR&EXTERIOR USE

All models within the Lemieux collection can be delivered in versions suitable for either indoor or outdoor use. Specialized construction methods produce designs perfectly adapted for specific end uses.

Le Palais 809 – Oak

Mahogany

The suppleness of maple, the warmth of pine, the richness of mahogany – your choice of wood can make all the difference. What matters is that it suits your tastes and style, and achieves the effect you’re looking for. Lemieux Doors prides itself on offering an impressive selection of woods that adapt gracefully to any decor and give your home an irresistible ambiance.

Glass Block

Crystal-clear, frosted, semi-opaque, with or without decorative patterns... Lemieux Doors offers over 94 types of glass, the widest selection offered by any door manufacturer. We custom build the door of your dreams, complete with the glazing that suits your vision to a tee.

Exterior doors offer a choice of two glazing technologies:

INSULATED GLASS
It does more than simply lower your heating bill, it will also make your home more comfortable by muffling exterior noise and reducing condensation.

LOW-E
High-quality reduced thermal emissivity glass cuts down on temperature variations, making efficient use of solar heat by reflecting it back in summer, and keeping it in during winter. So your home is more comfortable and energy-efficient, and you save money. Furthermore, low-e glass keeps it looking fresher, longer, by reducing the effects of UV radiation that dulls and fades the colours of your carpets and upholstery.

FRENCH DOORS

French door 1509 – Oak

French door 1504 – Cherry

This is a company that prides itself on its specialty for exceptional French doors. Built using a clamp glazed method perfected by Lemieux in 1992, we avoid the use of nails and staples for a clean, unblemished finish. It's an innovation that's had a definite impact, and helped Lemieux Doors become a leader in North American French door sales. Time-tested mortise & tenon construction, and a pioneering UV sealer system all contribute to the production of outstanding French doors.

Explore our wide range of glazing on pages 10 to 13.

LE CHATEAU

Le Chateau C35 – Arched top – Stained pine

Le Chateau C34 C – Square sticking – Stained oak

Le Chateau C411 C – Stained oak

This stunning collection of panelled doors is available in an almost endless range of design combinations, each of which will accentuate any room with its elegance and distinction. Constructed from MDF panelling for increased strength and stability, these doors are resistant to cracks and leaks caused by thermal expansion and contraction. Advanced engineering of rails and stiles results in a door that is not only lighter, but requires no special screws for installation.

Enjoy a sense of added depth and heightened impact by adding distinctive applied mouldings to any Le Chateau door.
